

2015 IPC UPDATE w/ UTAH STATE AMENDMENTS

This 12-hour course will cover the significant changes to the plumbing code update with Utah State Amendments. Whether you're an plumber, mechanical contractor, gas line installer, contractor, engineer, designer, or plant/facility maintenance professional, you will learn about major IPC changes that will impact your work.

Topics to be discussed include:

- ◆ Gas line sizing & installation
- ◆ Mechanical code provisions
- ◆ Combustion air
- ◆ Venting for applications

This course is for you if you install or maintain piping systems! It will be a live seminar with an open format, where discussion is encouraged; questions and comments are welcome!

ABOUT THE INSTRUCTOR

Dean Johnson is currently the Building Inspector for Roosevelt City, Utah (past 18 years), and former Building Inspector for Duchesne County. He has been a plumbing contractor for the past 45 years, operating his own business for much of that time, with experience in residential, commercial, industrial, and fire sprinklers. Dean has also been an adjunct Plumbing Apprentice Training instructor at the Uinta Basin Applied Technical College for six years.
