

The Change in Form of Government Study Committee

VOTING : THE MACHINERY OF DEMOCRACY

As a result of H.B.224 passed by the State Legislature in 2018, Grand County must change its current form of government and we need your input now! We must provide one single recommendation of a new form – and plan – for our county government for the voters to vote up or down at the ballot box.

We need to know what you think works well with our current system of government and what needs improving. We would greatly appreciate your input.

Grand County's current form is no longer allowed. We must adopt one of the 4 forms of government that is consistent with state law:

- County Commission
- Expanded County Commission
- County Executive-Council
- Council-Manager

For more information on our options
